Hard-Skills

Html5, css3, Sass, Less, Styled-components, Javascript, Reactjs, Typescript

Resume

I am a Front-end Developer with a degree in Systems Development, and previous experience as a Systems Analyst Assistant at PicPay Investments. In my last position, I was responsible for the complete development of a layout aimed at the platform's end user, performing tasks such as creating screen diagrams, developing components, and adding general features like buttons, submissions, and login functionalities, using React and TypeScript. Additionally, I also conducted end-to-end testing. Currently, I am focused on developing a personal project—a study platform geared towards the financial market

Professional Experience

PicPay Investments

04/2022 - 12/2023

Asistant System Analyst

I worked as a front-end developer, focusing on interface creation to deliver an innovative and functional user experience for the platform's users. Throughout this project, I implemented active responsiveness following the professional guidelines provided by the designer.

Selo ESG Pro Brasil

07/2024 -09/2023

Junior Front-end Developer

I worked as a front-end developer, using the Next.js framework along with TailwindCSS and Material UI to structure and architect the project. I was responsible for creating innovative and functional interfaces that provided an engaging and responsive user experience, always in line with the designer's guidelines.
